SUMMARY

Recent Information Technology graduate seeking a Software Developer position. Experienced in building web applications through academic team projects and personal projects using **React**, **Next.js**, **Node.js**, **ASP.NET Core**, and **PostgreSQL**. Familiar with **REST APIs**, **Git / GitHub**, and responsive design.

PROJECTS

IT Hub – E-Learning Platform For IT Students *(Personal Project)*

[Source Code](#) | [Live Demo](#)

- **Technologies:** Node.js, Express.js, PostgreSQL, Next.js, Material UI, Gemini API
- Developed a learning management system that enables instructors to create and manage online IT courses.
- Integrated a Gemini-powered AI assistant capable of understanding from lecture-level to course-level context, enabling students to ask questions and receive context-aware explanations while learning.
- Optimized API response times by 80% (reducing p95 latency from 978ms to 194ms) by implementing an efficient caching strategy on resource-constrained Render cloud environments.
- Leveraged Cloudinary Signed Upload to offload heavy file transfer workloads from the server, reducing file upload API overhead to nearly zero.

GTG Shop – B2C E-Commerce Platform *(Team Project, 5 Members)*

[Source Code](#) | [Live Demo](#)

- **Technologies:** ASP.NET Core, Entity Framework Core, PostgreSQL, SignalR, React, Material UI, Jetpack Compose, Retrofit
- Led a team of 5 members in planning, task allocation, and project coordination while contributing to system design and feature development.
- Developed backend APIs, web application features, and Android application modules, delivering a cross-platform e-commerce solution for electronic devices.
- Implemented JWT-based authentication and role-based authorization, providing secure access control and separate workflows for customers and administrators.
- Integrated a real-time support chat feature between customers and admins using SignalR, reducing message latency to sub-seconds compared to traditional HTTP polling.
- Integrated the VNPay sandbox payment gateway to simulate real-world online purchasing and payment workflows.

EDUCATION

Hanoi Architectural University

2021 – 2026

Bachelor of Engineering in Information Technology

Hanoi, Vietnam

- **GPA:** 3.37 / 4.0 (Good)
- **Honors:** Named to the Dean's List for academic excellence (Semester 1, AY 2024 - 2025)

SKILLS

Languages: JavaScript, TypeScript, C#, HTML5, CSS3

Framework & Libraries:

- **Frontend:** React, Next.js, Material UI, Tailwind CSS (Familiar)
- **Backend:** Node.js, Express.js, NestJS (Familiar), ASP.NET Core, Redis
- **ORMs:** Prisma ORM, Entity Framework Core

Database Management Systems: PostgreSQL, MS SQL Server, MySQL

Tools: Git / GitHub, Postman

Others: REST API, OOP, Basic Design Patterns
