SUMMARY

Recent Information Technology graduate seeking a Web Developer position. Experienced in building web applications through academic team projects and personal projects using **React**, **Next.js**, **Node.js**, **ASP.NET CORE**, and **PostgreSQL**. Familiar with **REST APIs**, **Git/GitHub**, and responsive design. Eager to apply technical skills and contribute to real-world software development projects.

PROJECTS

IT Hub – E-Learning Platform For IT Students *(Personal Project)*

- **Source Code:** github.com/nguyenhbtrung/it-hub
- **Live Demo:** ithub.vercel.app
- **Technologies:** Node.js, Express.js, PostgreSQL, Next.js, Material UI, Gemini API
- Developed a learning management system that enables instructors to create and manage online IT courses.
- Built a rich text editor supporting images, videos, code blocks, callout components,... Allowing instructors to create interactive and technically detailed course content.
- Integrated a Gemini-powered AI assistant capable of understanding from lecture-level to course-level context, enabling students to ask questions and receive context-aware explanations while learning.

GTG Shop – B2C E-Commerce Platform *(Team Project, 5 Members)*

- **Source Code:** github.com/nguyenhbtrung/electro-shop
- **Live Demo:** gtgshop.vercel.app
- **Technologies:** ASP.NET Core, Entity Framework Core, PostgreSQL, SignalR, React, Material UI, Jetpack Compose, Retrofit
- Led a team of 5 members in planning, task allocation, and project coordination while contributing to system design and feature development.
- Developed backend APIs, web application features, and Android application modules, delivering a cross-platform e-commerce solution for electronic devices.
- Implemented JWT-based authentication and role-based authorization, providing secure access control and separate workflows for customers and administrators.
- Built product discovery features including category filtering, brand filtering, keyword search, and browsing history tracking to improve product navigation and user experience.
- Integrated the VNPay sandbox payment gateway to simulate real-world online purchasing and payment workflows.

EDUCATION

Hanoi Architectural University

Bachelor of Engineering in Information Technology

2021 – 2026

Hanoi, Vietnam

- **GPA:** 3.37 / 4.0 (Good)
- **Honors:** Named to the Dean's List for academic excellence (Semester 1, AY 2024 - 2025)

SKILLS

Programming Languages: JavaScript, TypeScript, C#

Framework & Libraries:

- **Frontend:** React, Next.js, TailwindCSS, MaterialUI
- **Backend:** Node.js, Express.js, NestJS, ASP.NET Core
- **ORMs & Databases:** Prisma ORM, Entity Framework Core

Database Management Systems: PostgreSQL, MS SQL Server, MySQL

Tools: Git/Github, Postman

Others: REST API, OOP, basic design patterns
